Notice of Force Majeure – Revised Adjustment Mechanism for Diesel Surcharge

Dear Customer,

We are writing to formally inform you of an adjustment to our diesel surcharge mechanism, which is a direct consequence of the ongoing geopolitical situation in the Middle East and its significant impact on global oil markets.

The current extraordinary and unpredictable events have led to considerable volatility in global fuel prices. Diesel prices have increased by 15.52 % over the past week compared to the February average. As diesel constitutes a substantial portion of our operating costs, these circumstances are beyond our reasonable control and directly affect the cost basis of our services.

As a direct consequence of this development, a diesel surcharge of 5.20 % will be introduced for all customers of NTG Road Norway AS, effective Wednesday the 11th of March.

In accordance with the force majeure provisions, this notice therefore constitutes a formal notification that the current situation requires a change in the frequency of adjustments to the diesel surcharge. The revised mechanism applies to all customers, regardless of whether the diesel surcharge appears as a separate surcharge or is included in the agreed prices.

Subsequently, next time on the 16th of March, the diesel surcharge will be adjusted weekly to reflect prevailing market conditions as accurately as possible. This change is implemented as a necessary consequence of the extraordinary market volatility currently affecting fuel prices. Future adjustments on www.ntgroad.no

The purpose of this adjustment is to ensure transparency as well as a fair and accurate reflection of the actual fuel costs during a period of unstable market conditions. Once the market stabilizes, we will reassess the adjustment frequency.

We appreciate your understanding and continued cooperation during this period of extraordinary circumstances. If you have any questions, please do not hesitate to contact us.

Kind regards,
